

NAGENDRA BHADRAVATHI SRINIVASA MURTHY

Java Full Stack Developer

📞 +91 9972502615 | ✉️ bsnagendra612@gmail.com | 🔗 linkedin.com/in/nagendrabs04 |

PROFESSIONAL SUMMARY

Java Full Stack Developer with **4 years of professional experience** building scalable and high-performance **enterprise web applications** using **Java, Spring Boot, Microservices**, and **React.js**. Proven expertise in developing **RESTful APIs**, backend services with **Spring Boot, Hibernate, Spring Data JPA** and responsive front-end interfaces with **JavaScript** and **React.js**. Experienced in **PostgreSQL, Docker, Kubernetes**, and **AWS**, with strong knowledge of **cloud** deployment, application modernization, and **Agile** software delivery. **AWS Certified Solutions Architect – Associate** with a track record of delivering reliable enterprise-grade solutions.

TECHNICAL SKILLS

Languages & Frontend: Java 17, HTML5, CSS3, JavaScript, ReactJS.

Backend: Spring, Spring Boot, Spring MVC, Spring Data JPA, Hibernate, REST APIs, Microservices, OOP, Eureka Server, API Gateway, RestTemplate, Generative AI (fundamentals).

Databases: PostgreSQL, MySQL.

Cloud, DevOps & Tools: AWS (IAM, EC2, S3, API Gateway, VPC, CloudWatch, **Terraform**), Docker, **Kubernetes, OpenShift, Jenkins (CI/CD)**, Git, GitHub, Red Hat Quay, Jira, Eclipse, IntelliJ IDEA, VS Code.

Testing & Monitoring: JUnit, Mockito, Postman, JMeter, Selenium, Dynatrace, New Relic, Splunk.

Domain: PBM, Specialty Pharmacy Systems.

PROFESSIONAL EXPERIENCE

Endava Solutions India Private Limited (formerly GalaxE. Solutions)

Aug 2022 – Present

Senior Developer (Promoted: Associate → Developer)

International Technology Park Ltd., Bangalore

- Engineered scalable **Java/Spring Boot microservices** and **REST APIs** for specialty pharmacy modernization, reducing process latency by **30%** and supporting **8K–12K daily prescription transactions**
- Designed, developed, and optimized **10+ RESTful APIs** and service handlers using **Java 8, Spring Data JPA**, and modern Java features including **Streams, Lambda Expressions**, and **Optional** to improve service performance and backend reliability
- Executed migration of multiple enterprise microservices from **PCF** to **Red Hat OpenShift** across **six clusters**, driving **application modernization**, scalability improvements, and deployment consistency
- Migrated frontend applications to **AWS** using **S3, EC2**, and **CloudWatch**, eliminating on-premises dependencies and reducing operational costs by **25%**
- Developed a **Java-Selenium** automation tool for OpenShift configuration, reducing setup effort from **24 hours to 2 hours**; implemented **deployment automation** through **Jenkins** and **Groovy**, improving deployment speed by **30%** and reducing manual errors by **25%**
- Enhanced **ReactJS** frontend workflows, expanded **unit** and **integration testing** with **JUnit/Mockito** across **80+ test cases** and **85%+ coverage**, and strengthened **production reliability** through **Docker, OpenShift, Dynatrace, Splunk**, and **CloudWatch**

FEATURED PROJECTS

Patient Prescription Service Modernization

Client: Walgreens | Dec 2024 – Present

- Developed scalable **microservices** using **Java, Spring Boot**, and **Spring Data JPA** for prescription workflow modernization
- Engineered and optimized **10+ REST APIs** supporting **8K–12K daily transactions** with improved throughput and backend performance
- Cursor Artificial Intelligence** and **GitHub Copilot** as **Artificial Intelligence-assisted development tools** for Java/Spring Boot code generation, refactoring, debugging, codebase analysis, and JUnit/Mockito test generation, reducing repetitive development effort by **20 percent** and saving an estimated **3–5 engineering hours** per sprint, accelerating feature delivery and issue resolution.
- Built **JUnit** and **Mockito** coverage for critical services to improve release quality and reliability
- Impact:** Reduced process latency by **30%**, improved maintainability, and strengthened delivery confidence for enterprise releases

PBM Microservices Migration from PCF to OpenShift

Client: Evernorth | Aug 2022 – Nov 2024

- Migrated Java microservices from **PCF** to **OpenShift** across **six clusters** as part of a large-scale platform modernization initiative
- Deployed frontend workloads on **AWS S3/EC2** with **CloudWatch** monitoring to improve availability and eliminate on-premises dependency
- Built automation utilities using **Java** and **Selenium** for OpenShift configuration workflows and release readiness
- Authored deployment manifests and supported container image management in **Red Hat Quay** for streamlined containerized deployments
- Impact:** Reduced setup time from **24 hours to 2 hours**, improved deployment speed by **30%**, and reduced costs by **25%**

CERTIFICATIONS

- AWS Certified Solutions Architect – Associate** (AWS) | Credential ID: **b24553ceca504f25ae5f904fcf9ff9be**
- Ultimate AWS Certified Cloud Practitioner CLF-Co2** (Udemy)
- AWS Training** – AWS Resources, Terraform
- Generative AI Intro** (O'Reilly)
- Kubernetes for Beginners** (O'Reilly)

EDUCATION

Siddaganga Institute of Technology (SIT)

Bachelor of Engineering in Electrical and Electronics Engineering

Graduation: Aug 2022

Tumkur, India
